Update on activities since the last Board Meeting:

In my role as the Manual Therapy Chair of the Education Interest Group, I facilitated discussions with many individuals to submit a proposal for a two hour educational session for CSM 2015. I recruited individuals who work in academic and private practice and subsequently submitted proposals for CSM 2015. One proposed educational session was selected for presentation at CSM 2015 and is listed as number six below. The titles of the educational sessions are listed below:

1. “Common Clinical Findings with Uncommon Links: Clinical Integration of the Upper Quarter and Limb: Evidence, Evaluation and Intervention”

2. “Lumbar Hip Connection, Treating the Kinetic Chain with Applied Foundational Science and EBP”

5. “Spinal Pain in the Elderly: Results of Two Multi-Centered Observational Studies and the Implications on the Management of Low Back Treatment in the Elderly”

6. “Get a Kick out of Gait Analysis: Interventions for the Foot and Ankle”

In preparation for CSM 2016, I am contacting clinicians and researchers from Florida Gulf Coast University, educators from International Manual Therapy Seminars, the University of Illinois at Chicago and the University of Pittsburg. I look forward to serving the Orthopedic Section in the upcoming year.

Respectfully Submitted,

Kathleen Geist, PT, DPT, OCS, COMT, FAAOMPT
