Orthopaedic Section, APTA
Residency and Fellowship
Education Programs

Program Materials Provide:
- A base didactic curriculum for newly developing residency programs.
- A didactic supplement to credentialed residency programs.
- Informative supplements for residency directors, instructors, and residents (Residency curriculum package only).
- Final examination questions to assess comprehension of course materials.

How it Works:
The residency curriculum package or a la carte options are available to residents and directors currently in credentialed or developing residency programs in orthopaedic physical therapy and/or a related fellowship field. Individuals purchasing the residency curriculum or a la carte package must be current Orthopaedic Section members, or be willing to join the Orthopaedic Section. Developing residency programs have 2 years for their residents to be eligible for the reduced “resident cost” during which time they must demonstrate proof of application for APTA credentialing. A third year will be available during the credentialing process as needed. After the 3-year grace period, the cost will revert back to the typical member costs only if the residents or fellows are current Section members and will remain at that rate until the program is fully credentialed. The residency director will provide a list of current residents by completing and submitting the Supplemental Residency Education Curriculum Verification form (must include a residency curriculum schedule and resident contract or appointment letter). Once the Residency Director provides the list of current residents, curriculum schedule, and contract/appointment letter to the Section office, the resident or program director may purchase the curriculum materials. Included in the curriculum materials are 6 courses that covers most areas of the orthopaedic DSP, tests and scantron forms for the residents to complete, and instructional supplemental materials for faculty.

Residents will complete the tests upon recommendation from residency faculty, and upon completion of the tests, the residents or the director will mail the scantron forms to the Section office. Residents will receive notification of their scores via e-mail once the Section office scores the exam. No contact hours are earned for successful completion of the residency curriculum courses. Criteria for “passing” each of the tests is determined by the residency program director. If residents do not meet the criteria for passing set by their director, they may retake the tests up to 2 additional times. The director must contact the Section office to make this request. There is no fee for retaking tests. The residency program director determines the period of time in which the retake must be completed. Retake tests must be submitted to the Section office for scoring.

Also included in the residency package is a supplemental instructor checklist to be utilized by the Director and faculty as necessary to achieve learning objectives of the curriculum. All courses purchased (both the residency complete curriculum package or the a la carte options), will be provided on CD.
Each new cohort of residents must purchase the residency curriculum if the Residency Program continues to use any part or all courses from the residency curriculum or a la carte course initially purchased from the Section. Failure to purchase these courses is considered copyright infringement if the program continues to use any part or all of the Section’s residency curriculum courses for the residency program.

Residency Curriculum–Package
The residency curriculum package will be offered to residents and directors who are currently in a credentialed or developing residency program in orthopaedic physical therapy or a related fellowship area, and are current Orthopaedic Section members. The residency curriculum package consists of the 6 courses listed below, supplemental materials, and multiple choice tests with scantron forms.

Course Titles Included in the Residency Curriculum Package:
• ISC 14.2, Clinical Applications of Orthopaedic Basic Science
• ISC 15.2, Postoperative Management of Orthopaedic Surgeries
• ISC 16.1, Pharmacology
• ISC 17.1, Diagnostic Imaging in Physical Therapy
• DVD, Research and Evidence-based Practice

Fees: Residency Curriculum
• Orthopaedic Section members: $400 plus $10.00 shipping and handling

Residency Curriculum–A La Carte*
Independent study courses will be offered to residents requiring didactic materials for completion of their residency program. The courses listed below will be available for purchase by Residency Program Directors or Residents in credentialed or developing residency programs. Multiple-choice tests will be provided with the course materials.

Fees:
• 3-monograph courses: $45.00
• 6-monograph courses: $88.00
• 12-monograph course: $138.00
$10.00 shipping and handling per package.

Course Titles Available for A La Carte*:
<p>| ISC 13.1, Including the Patient in Therapy: Psychological Considerations and PT Delivery | ISC 19.1, Update on Anterior Cruciate Ligament Injuries |
| ISC 14.2, Clinical Applications of Orthopaedic Basic Science | ISC 19.2, The Female Athlete Triad |
| ISC 15.2, Postoperative Management of Orthopaedic Surgeries | ISC 19.3, Orthopaedic Issues and Treatment Strategies for the Pediatric Patient |
| ISC 16.1, Pharmacology | ISC 20.1, Orthopaedic Implications for Patients With Diabetes |
| ISC 17.1, Diagnostic Imaging in Physical Therapy | ISC 20.2, Joint Arthroplasty: Advances in Surgical Management and Rehabilitation |
