Brooks/UNF Orthopaedic Residency Program	
Jacksonville, FL	
Mission Statement/Focus of program:	Year Credentialed:
Orthopaedic Residency Mission	2007
To develop skilled, compassionate, evidence based rehabilitation practitioners who	Length of program:
provide excellent patient management within specialty areas of clinical practice.	
Orthopaedic Residency Program Goals	1 year
1. To support the mission, vision and values of Brooks Rehabilitation, to	
improve the quality of care provided to the patients/clients served by highly	
accomplished advanced practitioners.	
2. To be a nationally recognized provider for post-professional clinical training	
within the area of orthopaedic physical therapy.	
3. To receive and maintain credentialing recognition from the APTA for the	
Orthopaedic Residency.	
4. The program will prepare residents to be autonomous providers of physical	
therapy services who embrace the culture of a doctoring profession, within	
their specialized area of clinical practice.	
5. Residents will pursue ABPTS certification within their practice specialty	
upon completion of the program.	
6. Residents will provide professional development opportunities to health	
care practitioners within Brooks Rehabilitation as well as the local	
community, regionally, and nationally with emphasis in the following areas:	
a. clinical skill acquisition;	
b. performance of scholarly activities;	
c. educational training;	
d. understanding and embracing professionalism;	
e. service as clinical leaders; and	
f. efficient/effective practice management.	
Desired Applicant:	Tuition cost:
An individual who is committed to a path of life long learning via a challenging	None
and well rounded educational immersion experience would be an appropriate	
candidate for the Brooks/UNF Orthopaedic Residency program. A Florida PT	Application deadline:
license (or eligible) is required.	
Curriculum Description: (content, hours, mentoring hours, ect):	March 10 of each year.
The Brooks/UNF Orthopaedic Residency program is a full time program where the	
residents practice 40 hours per week. Our program has 5 Foundational Pillars	
consisting of:	Salary:
Clinical Competence	20% reduction from
Education	normal full time salary
	relative to that
Scholarly	individual's clinical and
Professionalism	professional
Practice Management	background/experiences.
Mentoring is the common thread that permeates throughout our program.	
We offer over 300 hours of didactic and psychomotor experiences throughout the	Benefits:
program within all of the foundational pillars. Our Residents also perform over	
300 hours of Directed Learning Activities (DLA's) that include shadowing MD's,	Full Benefits
teaching within a PT Professional program, performing community service, etc.	
Our residents receive 150 hours of 1:1 mentoring in their clinic with the resident's	
patients, from highly trained/advanced PT clinicians as their clinical mentors.	
Residents receive additional mentoring within the other areas of the foundational	
pillars over and above the 150 hours of clinical mentoring. Please see our website	
for further information.	
Mentor Qualifications:	# of Resident's
The majority of our mentors have a minimum of OCS and/or are Orthopaedic	Accepted:
	4-6 per year
Residency graduates. Several of our mentors are also Fellows of the AAOMPT.

University of Virginia-Healthsouth Orthopedic Residency Program Virginia			
Mission Statement/Focus of program: The University of Virginia-Healthsouth Orthopedic Residency Program	Year Credentialed: 2009		
is dedicated to providing advanced clinical training to our physical therapists as well as to develop the skills required for teaching and lifelong learning. Through this training we will be able to improve upon the resident's continued ability to provide superior and state of the art care to those individuals whose lives are entrusted to them.	Length of program: 1 year		
Desired Applicant: New Graduate Or Anyone interested in advancing skills	Tuition cost: 5000.00		
Curringham Descriptions (content hours mentaring hours of).	Application deadline: September 1		
Curriculum Description: (content, hours, mentoring hours, ect): The residency program will run over a twelve-month period. 6 weekend courses will be held on Saturday and Sunday with the precise schedule for each day determined by the residency director. The program will consist of 132 hours of educational content (approximately 36 of which will be through independent learning) and at least 150 hours of direct supervision of clinical patient care from an approved faculty member. The resident will have 4 hours a week of direct mentoring by a faculty member of the residency. A faculty member will be directly participating in the mentoring process in a 1:1 ratio during that time. This residency format is based on a structured, comprehensive approach to examination and treatment of orthopedic dysfunction of the spine and extremities. The content is based upon the American Physical Therapy Association's Description of Specialty Practice for orthopedics and includes didactic, laboratory, and clinical practice components under the supervision of accomplished instructors with appropriate experience and credentials. The series of week-end courses and collaborative clinical care time will provide the participant the opportunity to develop a framework for use in the evaluation and treatment of patients, as well as to review and reinforce the material learned in the didactic component. The aim of the program is to allow follow-up on the content presented in a clinical setting to enhance the development of clinical skills and facilitate and refine the clinical thought process.	Salary: New Graduate salary Benefits: Full benefits depending on residency site		
In the weekend courses there will be frequent reviews and progress will be at a pace that will accommodate all participants. The instructor to student ratio will be maximally 1:12 and include didactic instruction, lab instruction and practice, and direct clinical supervision during patient treatment. Clinical mentor to student ration will not exceed 1:1 [see below] Written and practical examinations will be performed on an ongoing basis to ensure mastery of the material.			
Mentor Qualifications: Mentor will be either OCS or FAAOMPT	# of Resident's Accepted: 2 or more
