

Orthopaedic Physical Therapy Practice **Instructions to Authors**

John Heick, PT, DPT, PhD, Editor; Rita Shapiro, PT, MA, DPT, Associate Editor
Sharon L. Klinski, Managing Editor

1. *Orthopaedic Physical Therapy Practice (OPTP)* serves as a publication option for articles pertaining to clinical practice as well as governance of the Academy of Orthopaedic Physical Therapy and corresponding Special Interest Groups (SIGs). Articles describing treatment techniques as well as case studies, small sample studies and reviews of literature are acceptable. Papers on new and innovative technologies will also be considered for publication. Language and format of articles should be consistent with the *Guide to Physical Therapist Practice*.

All SIG newsletter submissions must first be edited and approved by the SIG representative for suitable content prior to submission to OPTP Editors. Articles should adhere to a 2700 maximum word count (~3 printed pages), limit figures and/or tables (permissions to reprint must be obtained for borrowed material), and adhere to the AMA style, 11th ed. for references.

2. Manuscripts should be reports of personal experiences and written as such. Content should emphasize clinical application and patient care. Though suggested reading lists are welcomed, references should be kept to a maximum of 60 with the exception of reviews of literature or systematic reviews. All authors are required to sign a consent form indicating verification of original work and this form must accompany the article at the time of submission. This form, Disclosure, Conflict of Interest, and Copyright Release can be found on the Academy of Orthopaedic Physical Therapy web site (www.orthopt.org) under Membership and then Publications link. Authors are solely responsible for proper citation of work and avoiding any issues with copyright infringement related to writing or use of images or figures. For more information on plagiarism, authors may find the following resources helpful:

<http://www.plagiarism.org/>
<http://www.turnitin.com/>

3. Presentation of Research

OPTP welcomes research studies as well as case study reports. However, the primary focus should highlight clinical relevance with regard to evaluation, treatment, and/or patient outcomes. To ensure this objective, the final heading of the paper should be titled "Clinical Applications." Studies involving human subjects must have successfully met the requirements and been approved through an institutional review board. Case reports involving 3 or fewer subjects must follow HIPAA guidelines in protecting the privacy of subjects. For more information, access the following:

<http://www.hhs.gov/ocr/hipaa/>

4. Article Review Process

All initial reviews are completed by the editorial team. Recognized experts may also be queried to review topics in their areas of expertise. Articles are reviewed in the order they are received and

printed in the order of acceptance. Authors will receive a confirmation of the submission and will be updated on the article status after the review process is completed.

5. Manuscript Preparation Guidelines

Title Page - include the author's name, degree, title, current place of work or affiliation, corresponding address, phone, and E-mail address.

Abstract - 150 words or less using double space format. Abstracts at a minimum should include the following headings: Background and Purpose, Methods, Findings, Clinical Relevance, Conclusion.

Key Words – provide a list of 3 to 4 pertinent words in alphabetical order; NOTE: do *not* repeat words that are part of the title

Format – text should be double-spaced, use a 12-point font; margins should be 1 inch on each side. Articles should be a maximum of 4,000 words. Headings should be formatted as follows:

MAIN HEADING

Secondary Heading

Tertiary heading

Submit your article as one document with all needed components; although the figures and tables can be saved and submitted separately.

SOME HELPFUL HINTS IN REGARDS TO FOLLOWING AMA STYLE

Current convention and AMA style 11th ed. uses one space after punctuation marks.

Acronyms, Abbreviations, Initialisms:

Acronyms, abbreviations, and initialisms are discouraged from use, except for well-known and accepted units of measurement and some well-recognized terms.

- If used, spell out at the first use, even if the acronym or initialism is well-known. Do not place periods between the letters of an acronym, abbreviation, or initialism.
- State names should always appear as full names in the text of a manuscript. If included in references, use the two-letter abbreviation.

Numbers:

Numerals (1, 2, 3, etc.) should be used in all writing, except when:

- The number begins the sentence or title
- Common fractions
- Ordinals: first through ninth
- Number spelled out in quotations or titles of works cited.
- One number may be spelled out, if the sentence requires multiple numbers to be placed next to each other. eg, "If 12 16-year-olds had this reaction..." should be changed to "If twelve 16-year-olds..."

References:

You need to cite when:

- using a direct quotation, even if it is in quotation marks
- using facts that are not common knowledge (what the reader can reasonably be expected to know)
- paraphrasing or rewriting the author's ideas
- summarizing the data or argument of an author
- using the key words or phrases from the author or using synonyms
- mentioning the author's name in your text
- writing a sentence that mostly consists of your own thoughts, but you have made a reference to another author's ideas

When in doubt, err on the side of caution, and cite; however, you do not need to repeatedly cite the same citation multiples times within the same sentence or paragraph.

Citation of Reference List—examples of most common citation types are provided below. For more complex citations, please refer to the *American Medical Association Manual of Style*, 11th ed. References should be numbered sequentially as they appear in the text and should correspond to the superscript number in the text. Do not repeat the same reference using a different number in the reference list. Only references cited in the paper should be listed.

The Basics

- Always consult the primary source and never cite a reference that you have not read yourself.
- Limit your references to a maximum of 60.
- References should be numbered sequentially as they appear in the text and should correspond to the superscript number in the text. Do not repeat the same reference using a different number in the reference list.
- Take care to submit accurate and complete publication data.
- For any source (book, journal article, proceedings, etc), the author and editor names should be formatted as follows: Lastname INITIALS.
- If 6 or fewer authors, list each:
Chevan J, Clapis PA. *Physical Therapy Management of Low Back Pain: A Case-Based Approach*. Burlington, MA: Jones & Bartlett Learning; 2013:191-213.
- If more than 6 authors, list the first 3 and use "et al":
Schneider KJ, Emery CA, Black A, et al. Adapting the dynamic, recursive model of sport injury to concussion: an individualized approach to concussion prevention, detection, assessment, and treatment. *J Orthop Sports Phys Ther*. 2019;49(11):799-810. doi: 10.2519/jospt.2019.8926. Epub 2019 Oct 14.
- References to material not yet accepted for publication or to personal communication are not acceptable as references.

Journal Articles

- Capitalize only the first letter of the first word of an article title. All other words—including the first word of a subtitle—should be lowercase. Proper nouns are the exception to this rule:
 Napier C, MacLean CL, Maurer J, Taunton JE, Hunt MA. Real-time biofeedback of performance to reduce braking forces associated with running-related injury: an exploratory study. *J Orthop Sports Phys Ther.* 2019;49(3):136-144. doi: 10.2519/jospt.2019.8587. Epub 2018 Dec 7.

Books

- **Italicize book titles and format in title case.**
- **Reference to an entire book:**
 Jewell DV. Guide to Evidence-Based Physical Therapist Practice. 2nd ed. Sudbury, MA: Jones & Bartlett Learning; 2011.
- Reference to a chapter in a book:
 Goodman CC. The introduction to pathology of the musculoskeletal system. In: Goodman CC, Hedgeson K, eds. *Pathology: Implications for the Physical Therapist.* 4th ed. St. Louis, MO: Elsevier Saunders; 2015:1153-1158.
- *Editor(s) as author:*
 Olson KE, ed. *Manual Physical Therapy of the Spine.* 2nd ed. Philadelphia, PA: Saunders; 2016:28-36.

Web Site

- Use the URL that will take the reader directly to the page of the article you are referencing.
- Web sites are updated frequently so it is important to provide the date the site was accessed.
 American Physical Therapy Association. Guide to Physical Therapist practice. apta.org/guide/. Accessed January 22, 2020.

Holm I, Risber MA, Roos EM, Skou ST. A pragmatic approach to the implementation of osteoarthritis guidelines has fewer potential barriers than recommended implementation frameworks [abstract]. *J Orthop Sports Phys Ther.* 2019;49(1):1-4. <https://www.jospt.org/doi/abs/10.2519/jospt.2019.0601>. Accessed January 22, 2020.

Format and Presentation of Figures, Graphics, Tables, and Appendices

Figures and Graphics (placed after the reference list; do not embed within the text)

- Figures should be submitted as electronic graphic files in TIF, JPG, EPS, or PDF format, with the resolution set at a minimum of 300 dpi. Limit figures to a maximum of 5. A photo release form must accompany any photographs where patients may be seen. Figure legends may be phrases or complete sentences, capitalized in sentence case, and end with a period:

Figure 2. Kinesthetic testing using an electronic inclinometer.

Figures should be numbered consecutively. For helpful guidelines on submitting figures online, visit Cadmus Journal Services (<http://www.cadmus.com/>). Lettering should be large, sharp, and clear, and abbreviations used within figures should agree with *OPTP* style. Color photographs are encouraged but must be of excellent resolution and good contrast.

- Tables should be formatted in Word and placed together at the end of the manuscript, after the references. Tables should be numbered consecutively and limited to a maximum of 5. Refer to recent issues for acceptable table formats.

Tables – provide tables to present information more clearly and concisely than if presented in the text. Table titles are usually written as phrases. They are capitalized in title case and do not employ terminal punctuation:

Table 1. Symptoms of Chronic Fatigue Syndrome

- Appendixes are cited in the text as a table or figure would be and are placed at the end of the text before the references. Please note an appendix contains supplementary material that is not an essential part of the text itself but which may be helpful in providing a more comprehensive understanding or is information that is too cumbersome to be included in the body of the paper.

Articles should be sent to Sharon Klinski, *OPTP* Managing Editor at sklinski@orthopt.org
