

As of May 2, 2014 we have recruited 9 subjects; 6 have been tested, and the remaining 3 have been scheduled to complete scanning. We are currently trying to scan 1 subject per week based on availability of the subject and the scanner. To increase recruitment we will be submitting a print and website advertisement to IRB for review. Upon approval, these will be posted in the elevators within the medical center, faxed to area physician offices and posted on the Bradley University website.
